## PUBLIC SERVICE COMMISSION OF WISCONSIN

Application of the Village of Allouez Water Department, Brown  
County, Wisconsin, for Authority to Increase Water Rates

70-WR-105

**FINAL DECISION**

This is the Final Decision in the Class 1 proceeding conducted by the Public Service Commission (Commission) on the application of Village of Allouez Water Department (applicant) for approval to increase water rates. This application is APPROVED subject to conditions.

**Introduction**

The applicant applied to the Commission on September 4, 2015, for authority to increase water rates. Pursuant to due notice, the Commission held a telephonic hearing at Madison and Green Bay on February 10, 2015, before Administrative Law Judge Michael E. Newmark. The applicant is the only party to this proceeding.

**Findings of Fact**

1. The applicant's presently authorized rates for water utility service will produce operating revenues of \$3,351,853 for the 2016 test year. These rates fall short of the test year revenue needed by \$377,962 and are unreasonable.
2. The estimated net investment rate base applicable to water utility operations for the 2016 test year is \$12,562,095.
3. The rate changes set forth for water service in Appendix C will permit the applicant to earn the necessary revenue requirement and are consistent with the cost of service and rate design.

**Conclusions of Law**

1. The applicant is a municipal public utility as defined in Wis. Stat. § 196.01(5)(a).
2. The Commission has authority under Wis. Stat. §§ 196.02(1), 196.03(1) and (3), 196.19, 196.20, 196.22, 196.37(1), (2), and (3), and 196.395 to authorize the applicant to increase water utility rates and revise tariff provisions.
3. The Commission has authority under Wis. Stat. § 15.02(4) to delegate to the Administrator of the Division of Water, Telecommunications and Consumer Affairs, those functions vested by law as enumerated above.

**Opinion**

**Net Investment Rate Base**

The estimated net investment rate base for the 2016 test year is as follows:

Utility Financed Plant in Service	\$16,002,847
Less: Accumulated Provision for Depreciation	<u>\$3,405,532</u>
Net Plant in Service	\$12,597,315
Plus: Materials and Supplies	57,000
Less: Regulatory Liability for Pre-2003 Accumulated Depreciation - CIAC	<u>92,220</u>
Net Investment Rate Base	<u>\$12,562,095</u>

**Comparative Income Statement**

The estimated test year income statement showing the effect of the increase in revenue which will result from authorized rates is as follows:

	<u>At Present Rates</u>	<u>Authorized Increase</u>	<u>After Rate Increase</u>
Operating Revenues	\$3,351,853	\$377,962	\$3,729,815
Operating Expenses:			
Oper. & Maint. Exp.	\$2,599,832		\$2,599,832
Depreciation	365,950		365,950
Taxes & Tax Equiv.	<u>324,360</u>		<u>324,360</u>
Total Oper. Expenses	<u>\$3,290,142</u>		<u>\$3,290,142</u>
Oper. Income (or Loss)	<u>\$61,711</u>		<u>\$439,673</u>
Rate of Return	0.49%		3.50%

The depreciation expense included in the revenue requirement for the 2016 test year was computed using the depreciation rates shown in Appendix E. These depreciation rates are effective on January 1, 2016, for computing the depreciation expense on the average investment for each plant account.

### **Capital Structure**

The applicant requested a return on net investment rate base of 3.50 percent. The applicant's capital employed in providing public utility service is estimated to be 40.91 percent municipal equity that is associated with the net investment rate base and 59.09 percent long-term debt. The composite cost of debt capital is 2.46 percent. The return on rate base of 3.50 percent requested by the applicant would provide a return on municipal earning equity which is below the current cost of municipal capital. The applicant desires to mitigate the rate increase on present water customers and believes that such return will generate sufficient revenue to meet its needs in the test year. While the requested return of 3.50 percent is less than the current cost of

municipal capital, this lower rate of return provides for the financial viability of the utility while keeping rates lower for ratepayers.

### **Cost of Service**

Commission staff submitted for the record an analysis of the cost of supplying water for general service and for public fire protection service. Commission staff used the base-extra capacity cost allocation method for the analysis. Under this method, the operating expenses are allocated first to the service cost functions of extra-capacity maximum-day and maximum-hour demand, base, customer, and fire protection and then to each of the customer classes served. Summaries of such analyses are shown in Schedules 8 and 11 of Exhibit 5 of the record in this proceeding. Appendix B shows customer class revenue requirements resulting from the cost analysis compared with revenues at authorized rates.

### **Rates**

Water service rates authorized in this decision will result in an estimated net operating income of approximately \$439,673 which provides a 3.50 percent return on the water utility net investment rate base of \$12,562,095. The applicant was provided with Commission staff's proposed rates for review prior to the hearing and had no objection to these rates.

As shown in attached Appendix B, the base-extra capacity cost allocation method results in a relatively wide range of increases in the charges to the various general service customer classes to reflect the cost of providing service to such classes. The percentage rate increase to any individual customer will not necessarily equal the overall percentage increase to the associated customer class, but will depend on the specific usage level of that customer.

Two water customers appeared at the hearing in opposition to the rate increase. They expressed concern over the magnitude of the increase and its impact on customers. The Commission appreciates the customers' concern in this matter. However, the Commission finds that the revenue resulting from the authorized rates is necessary to provide for the financial needs of the utility over the long-term. The Commission further concludes that the rates as proposed by Commission staff would provide a reasonable and nondiscriminatory recovery of the revenue requirement. Accordingly, the Commission approves Commission staff's proposed rates as shown in Exhibit 5 of the hearing record.

The authorized rates as set forth in Appendix C are based on the cost of supplying various classes or types of service. All customers will be required to pay an appropriate amount for the service provided.

Some typical water bills for residential, commercial, industrial, and public authority customers were computed using Schedule Mg-1 to compare existing rates with the new rates. That comparison is set forth in Appendix D.

The overall increase in annual revenues is 12 percent, comprised of a 14 percent increase in general service charges and no increase in fire protection charges. A typical residential customer's bill for general service will rise 12 percent. Rates have risen because of a 57 percent increase in gross plant investment and a 10 percent increase in operating expenses since the applicant's last rate case in 2008. The typical bills calculated using the authorized rates are above average when compared with those of similar water utilities in the state.

The annual public fire protection charge will remain at its existing level compared to a 14 percent increase in general service charges. As shown by the results of the cost-of-service

analysis, the present level of the public fire protection charge is slightly above the level of the cost of providing service. Rather than reduce the public fire protection charge to the level indicated in the cost study, the Commission finds it reasonable to keep the public fire protection charge at its existing level.

The authorized general service rates provide a greater percentage increase to large-volume users than for average residential customers. This greater increase is caused by the relatively larger increases in the volume rate for the high-volume nonresidential customers based on the results of the base-extra capacity cost allocation as discussed above. The greater increase to large-volume users is reasonable in that the authorized rates more appropriately reflect the cost of providing service than do the present rates.

The applicant requested rates that would transition the charges for public fire protection from a combination of an annual municipal charge and direct charges on the water bills of customer for the remainder to only direct billing of water utility public fire protection costs to general service customers over three years, 2016 to 2018. This request conforms to Wis. Stat. § 196.03(3)(b), which provides municipalities the option to include the public fire protection charges directly in the water utility bills of general service customers.

As requested, authorized rates as set forth in Appendix B, Schedule F-1, provide for the transition to all direct charging of public fire protection costs to general service customers. These rates are reasonable and just. All customers will be required to pay an appropriate amount for the service provided.

The applicant requested that its written rules setting forth the method of determining a reduced rate for a leak, unknown to the customer and found in an appliance or the plumbing, be

Docket 70-WR-105

included in the applicant's tariff provisions (water customer supplemental rules). The proposed rules were incorporated into the record by receipt of Exhibit 5 which incorporates the rules by reference. They are in accordance with Commission policy and the Wisconsin Administrative Code.

The applicant's tariff provisions (operating rules and main extension rules) are consistent with those of other Wisconsin water utilities and are in accordance with Commission policy and the Wisconsin Administrative Code.

**Effective Date**

The test year commenced on January 1, 2016. Pursuant to Wis. Stat. §§ 196.19 and 196.21, the changes in rates and tariff provisions that are authorized in this Final Decision take effect no sooner than one day after the date of service, provided that these rates and tariff provisions are filed with the Commission and the utility makes a copy of the new rates available to the public before this date by placing a copy of the new rates at locations where customer payments are accepted, on the utility's Internet site, or in a form and place that is otherwise readily accessible to the public.

**Order**

1. This Final Decision takes effect one day after the date of service.
2. The authorized rate increases and tariff provisions shall take effect no sooner than one day after the day the utility has: (a) filed these rates and tariff provisions with the Commission; and (b) made them available to the public at locations where customer payments are accepted, on the utility's Internet site, or in a form and place that is otherwise readily accessible to the public, pursuant to Wis. Stat. § 196.19 and Wis. Admin. Code

Docket 70-WR-105

§ PSC 185.33(1)(f). If a copy of the new rates and tariff provisions is not made available to the public when they are filed with the Commission, the new rates and tariff provisions shall take effect one day after the day they are made available to the public.

3. The rates approved in this docket shall take effect no later than 90 days from the service date of this Final Decision or as directed by the Commission or Commission staff.

4. Jurisdiction is retained.

P.O. Box 7854  
Madison, Wisconsin 53707-7854

**NOTICE OF RIGHTS FOR REHEARING OR JUDICIAL REVIEW, THE  
TIMES ALLOWED FOR EACH, AND THE IDENTIFICATION OF THE  
PARTY TO BE NAMED AS RESPONDENT**

The following notice is served on you as part of the Commission's written decision. This general notice is for the purpose of ensuring compliance with Wis. Stat. § 227.48(2), and does not constitute a conclusion or admission that any particular party or person is necessarily aggrieved or that any particular decision or order is final or judicially reviewable.

*PETITION FOR REHEARING*

If this decision is an order following a contested case proceeding as defined in Wis. Stat. § 227.01(3), a person aggrieved by the decision has a right to petition the Commission for rehearing within 20 days of the date of service of this decision, as provided in Wis. Stat. § 227.49. The date of service is shown on the first page. If there is no date on the first page, the date of service is shown immediately above the signature line. The petition for rehearing must be filed with the Public Service Commission of Wisconsin and served on the parties. An appeal of this decision may also be taken directly to circuit court through the filing of a petition for judicial review. It is not necessary to first petition for rehearing.

*PETITION FOR JUDICIAL REVIEW*

A person aggrieved by this decision has a right to petition for judicial review as provided in Wis. Stat. § 227.53. In a contested case, the petition must be filed in circuit court and served upon the Public Service Commission of Wisconsin within 30 days of the date of service of this decision if there has been no petition for rehearing. If a timely petition for rehearing has been filed, the petition for judicial review must be filed within 30 days of the date of service of the order finally disposing of the petition for rehearing, or within 30 days after the final disposition of the petition for rehearing by operation of law pursuant to Wis. Stat. § 227.49(5), whichever is sooner. If an *untimely* petition for rehearing is filed, the 30-day period to petition for judicial review commences the date the Commission serves its original decision.<sup>1</sup> The Public Service Commission of Wisconsin must be named as respondent in the petition for judicial review.

If this decision is an order denying rehearing, a person aggrieved who wishes to appeal must seek judicial review rather than rehearing. A second petition for rehearing is not permitted.

Revised: March 27, 2013

**VILLAGE OF ALLOUEZ WATER DEPARTMENT**

**Authorized Water Rates and Rules**

Purchased Water Adjustment Clause - - - PWAC-1

Delete.

Public Fire Protection Service - - - F-1 (Effective in 2016)

Public fire protection service includes the use of hydrants for fire protection service only and such quantities of water as may be demanded for the purpose of extinguishing fires within the service area. This service shall also include water used for testing equipment and training personnel. For all other purposes, the metered or other rates set forth, or as may be filed with the Public Service Commission, shall apply.

Municipal Charge:

The annual charge for public fire protection service to the Village of Allouez shall be \$276,725. The utility may bill for this amount in equal monthly installments.

Direct Charges:

Under Wis. Stat. § 196.03(3)(b), the Village of Allouez has chosen to have the utility bill the retail general service customers for public fire protection service.

Monthly Public Fire Protection Service Charges:

5/8 -inch meter - \$	3.57	3 -inch meter - \$	54.00
3/4 -inch meter - \$	3.57	4 -inch meter - \$	89.00
1 -inch meter - \$	9.00	6 -inch meter - \$	179.00
1¼ -inch meter - \$	13.00	8 -inch meter - \$	286.00
1½ -inch meter - \$	18.00	10 -inch meter - \$	429.00
2 -inch meter - \$	29.00	12 -inch meter - \$	571.00

Customers who are provided service under Schedules Mg-1, Ug-1, or Sg-1 shall be subject to the charges in this schedule according to the size of their primary meter.

Billing: Same as Schedule Mg-1.

Public Fire Protection Service - - - F-1 (Effective in 2017)

Public fire protection service includes the use of hydrants for fire protection service only and such quantities of water as may be demanded for the purpose of extinguishing fires within the service area. This service shall also include water used for testing equipment and training personnel. For all other purposes, the metered or other rates set forth, or as may be filed with the Public Service Commission, shall apply.

Municipal Charge:

The annual charge for public fire protection service to the Village of Allouez shall be \$138,362. The utility may bill for this amount in equal monthly installments.

Direct Charges:

Under Wis. Stat. § 196.03(3)(b), the Village of Allouez has chosen to have the utility bill the retail general service customers for public fire protection service.

Monthly Public Fire Protection Service Charges:

5/8 -inch meter - \$	5.36	3 -inch meter - \$	80.40
3/4 -inch meter - \$	5.36	4 -inch meter - \$	134.00
1 -inch meter - \$	13.40	6 -inch meter - \$	268.00
1¼ -inch meter - \$	19.80	8 -inch meter - \$	429.00
1½ -inch meter - \$	26.80	10 -inch meter - \$	643.00
2 -inch meter - \$	42.90	12 -inch meter - \$	858.00

Customers who are provided service under Schedules Mg-1, Ug-1, or Sg-1 shall be subject to the charges in this schedule according to the size of their primary meter.

Billing: Same as Schedule Mg-1.

Public Fire Protection Service - - - F-1 (Effective in 2018)

Public fire protection service includes the use of hydrants for fire protection service only and such quantities of water as may be demanded for the purpose of extinguishing fires within the service area. This service shall also include water used for testing equipment and training personnel. For all other purposes, the metered or other rates set forth, or as may be filed with the Public Service Commission, shall apply.

Under Wis. Stat. § 196.03(3)(b), the Village of Allouez has chosen to have the utility bill the retail general service customers for public fire protection service.

Monthly Public Fire Protection Service Charges:

5/8 -inch meter - \$	7.16	3 -inch meter - \$	108.00
3/4 -inch meter - \$	7.16	4 -inch meter - \$	179.00
1 -inch meter - \$	17.90	6 -inch meter - \$	358.00
1¼ -inch meter - \$	26.50	8 -inch meter - \$	573.00
1½ -inch meter - \$	35.80	10 -inch meter - \$	859.00
2 -inch meter - \$	57.30	12 -inch meter - \$	1,146.00

Customers who are provided service under Schedules Mg-1, Ug-1, or Sg-1 shall be subject to the charges in this schedule according to the size of their primary meter.

Billing: Same as Schedule Mg-1.

Private Fire Protection Service - Unmetered - - - Upf-1

This service shall consist of permanent or continuous unmetered connections to the main for the purpose of supplying water to private fire protection systems such as automatic sprinkler systems, standpipes, and private hydrants. This service shall also include reasonable quantities of water used for testing check valves and other backflow prevention devices.

Monthly Private Fire Protection Service Demand Charges:

2 - inch or smaller connection - \$	8.00
3 - inch connection - \$	15.00
4 - inch connection - \$	25.00
6 - inch connection - \$	50.00
8 - inch connection - \$	80.00
10 - inch connection - \$	120.00
12 - inch connection - \$	160.00
14 - inch connection - \$	200.00
16 - inch connection - \$	240.00

Billing: Same as Schedule Mg-1.

General Service - Metered - - - Mg-1

Monthly Service Charges (All Customer Classes):

5/8 -inch meter - \$	11.00	3 -inch meter - \$	86.00
3/4 -inch meter - \$	11.00	4 -inch meter - \$	140.00
1 -inch meter - \$	19.00	6 -inch meter - \$	258.00
1 1/4 -inch meter - \$	26.00	8 -inch meter - \$	404.00
1 1/2 -inch meter - \$	33.00	10 -inch meter - \$	535.00
2 -inch meter - \$	51.00	12 -inch meter - \$	705.00

Plus Volume Charges:

Residential Customers:

First	2,000	gallons used monthly - \$5.40 per 1,000 gallons
Next	8,000	gallons used monthly - \$7.00 per 1,000 gallons
Over	10,000	gallons used monthly - \$9.50 per 1,000 gallons

Multifamily Residential Customers:

All water used monthly - \$6.80 per 1,000 gallons

Nonresidential Customers:

All water used monthly - \$6.80 per 1,000 gallons

**Residential Class** includes single-family homes, duplexes, and individually-metered condominiums, apartment buildings, and mobile home parks.

**Multifamily Residential Class** includes master-metered multifamily dwelling units such as condominiums, apartment buildings, and mobile home parks.

**Nonresidential Class** includes commercial, industrial, and public authority customers. Commercial customers include business entities and institutions, except governmental entities, that provide goods or services. Churches and parochial schools are not governmental and are classified as commercial. Industrial customers include customers who are engaged in the manufacture or production of goods. Public Authority customers include any department, agency, or entity of local, state, or federal government, including public schools, colleges, and universities.

Billing: Bills for water service are rendered monthly and become due and payable upon issuance following the period for which service is rendered. A late payment charge of 1 percent per

month will be added to bills not paid within 20 days of issuance. This late payment charge shall be applied to the total unpaid balance for utility service, including unpaid late payment charges. This late payment charge is applicable to all customers. The utility customer may be given a written notice that the bill is overdue no sooner than 20 days after the bill is issued. Unless payment or satisfactory arrangement for payment is made within the next 10 days, service may be disconnected pursuant to Wis. Admin. Code ch. PSC 185.

Combined Metering: For residential customers, volumetric readings from all meters on a single service lateral shall be combined for billing. For nonresidential customers, volumetric readings may be combined for billing if the utility for its own convenience places more than one meter on a single water service lateral. Multiple meters placed for the purpose of identifying water that is not discharged into the sanitary sewer are not considered for utility convenience and may not be combined for billing nonresidential customers. This requirement does not preclude the utility from combining readings where metering configurations support such an approach. Volumetric readings from individually metered separate service laterals may not be combined for billing purposes.

#### Other Charges - - - OC-1

Payment Not Honored by Financial Institution Charge: The utility shall assess a \$25.00 charge when a payment rendered for utility service is not honored by the customer's financial institution. This charge may not be in addition to, but may be inclusive of, other such charges when the payment was for multiple services.

Special Billing Charge: The utility shall assess a \$25.00 charge to the requestor to cover administrative expenses whenever an existing customer or the property owner requests a special billing outside of the normal utility billing. This charge may not be assessed to a new customer.

Billing: Same as Schedule Mg-1.

#### Non-Sufficient Funds Charge - - - NSF-1

Delete.

#### Public Service - - - Mpa-1

##### Metered Service

Water used by the Village of Allouez on an intermittent basis for flushing sewers, street washing, flooding skating rinks, drinking fountains, etc., shall be metered and billed according to the rates set forth in Schedule Mg-1 for nonresidential customers.

Unmetered Service

Where it is impossible to meter the service, the utility shall estimate the volume of water used based on the pressure, size of opening, and the period of time the water is used. The estimated quantity shall be billed at the volumetric rates set forth in Schedule Mg-1 for nonresidential customers, excluding any service charges.

Billing: Same as Schedule Mg-1.

General Water Service - Unmetered - - - Ug-1

Service may be supplied temporarily on an unmetered basis where the utility cannot immediately install a water meter, including water used for construction. Unmetered service shall be billed the amount that would be charged to a metered residential customer using 4,000 gallons of water per month under Schedule Mg-1, including the service charge for a 5/8-inch meter. If the utility determines that actual usage exceeds 4,000 gallons of water per month, an additional charge for the estimated excess usage shall be made according to the rates under Schedule Mg-1.

This schedule applies only to customers with a 1-inch or smaller service connection. For customers with a larger service connection, the utility shall install a temporary meter and charges shall be based on the rates set forth under Schedule Mg-1.

Billing: Same as Schedule Mg-1.

Seasonal, Emergency, or Temporary Service - - - Mgt-1

Delete.

Seasonal Service - - - Sg-1

Seasonal customers are general service customers who voluntarily request disconnection of water service and who resume service at the same location within 12 months of the disconnection, unless service has been provided to another customer at that location in the intervening period. The utility shall bill seasonal customers the applicable service charges under Schedule Mg-1 year-round, including the period of temporary disconnection.

Seasonal service shall include customers taking service under Schedule Mg-1 or Schedule Ug-1.

Upon reconnection, the utility shall apply a charge under Schedule R-1 and require payment of any unpaid charges under this schedule.

Billing: Same as Schedule Mg-1, unless the utility and customer agree to an alternative payment schedule for the period of voluntary disconnection.

Building and Construction Water Service - - - Mz-1

Delete.

Bulk Water - - - BW-1

All bulk water supplied from the water system through hydrants or other connections shall be metered or estimated by the utility. Utility personnel or a party approved by the utility shall supervise the delivery of water.

Bulk water sales are:

- A. Water supplied by tank trucks or from hydrants for the purpose of extinguishing fires outside the utility's service area;
- B. Water supplied by tank trucks or from hydrants for purposes other than extinguishing fires, such as water used for irrigation or filling swimming pools; or,
- C. Water supplied from hydrants or other temporary connections for general service type applications, except that Schedule Ug-1 applies for water supplied for construction purposes.

A service charge of \$35.00 and a charge for the volume of water used shall be billed to the party using the water. The volumetric charge shall be calculated using the highest volumetric rate for residential customers under Schedule Mg-1. In addition, for meters that are assigned to bulk water customers for more than 7 days, the applicable service charge in Schedule Mg-1 will apply after the first 7 days.

The water utility may require a reasonable deposit for the temporary use of its equipment under this and other rate schedules. The deposit(s) collected shall be refunded upon return of the utility's equipment. Damaged or lost equipment shall be repaired or replaced at the customer's expense.

Billing: Same as Schedule Mg-1.

Reconnection Charges - - - R-1

The utility shall assess a charge to reconnect a customer, which includes reinstalling a meter and turning on the valve at the curb stop, if necessary. A utility may not assess a charge for disconnecting a customer.

During normal business hours:	\$ 35.00
After normal business hours:	\$100.00

Billing: Same as Schedule Mg-1.

Water Lateral Installation Charge - - - Cz-1

The utility shall charge a customer for the actual cost of installing a water service lateral from the main through curb stop and box if these costs are not contributed as part of a subdivision development or otherwise recovered under Wis. Stats. Chapter 66.

Billing: Same as Schedule Mg-1.

Rules and Regulations - - - X-1

Delete Schedule X-1. Incorporate the operating rules for municipal water utilities as provided by the Public Service Commission.

Water Main Extension Rule - - - X-2

Water mains will be extended for new customers on the following basis:

- A. Where the cost of the extension is to immediately be collected through assessment by the municipality against the abutting property, the procedure set forth under Wis. Stat. § 66.0703 will apply, and no additional customer contribution to the utility will be required.
- B. Where the municipality is unwilling or unable to make a special assessment, the extension will be made on a customer-financed basis as follows:
  - 1. The applicant(s) will advance as a contribution in aid of construction the total amount equivalent to that which would have been assessed for all property under paragraph A.

2. Part of the contribution required in paragraph B.1. will be refundable. When additional customers are connected to the extended main within 10 years of the date of completion, contributions in aid of construction will be collected equal to the amount which would have been assessed under paragraph A. for the abutting property being served. This amount will be refunded to the original contributor(s). In no case will the contributions received from additional customers exceed the proportionate amount which would have been required under paragraph A., nor will it exceed the total assessable cost of the original extension.
- C. When a customer connects to a transmission main or connecting loop installed at utility expense within 10 years of the date of completion, there will be a contribution required of an amount equivalent to that which would have been assessed under paragraph A.

#### Water Main Installations in Platted Subdivisions - - - X-3

Application for installation of water mains in regularly platted real estate development subdivisions shall be filed with the utility.

If the developer, or a contractor employed by the developer, is to install the water mains (with the approval of the utility), the developer shall be responsible for the total cost of construction.

If the utility or its contractor is to install the water mains, the developer shall be required to advance to the utility, prior to the beginning of the construction, the total estimated cost of the extension. If the final costs exceed estimated costs, an additional billing will be made for the balance of the cost due. This balance is to be paid within 30 days. If final costs are less than estimated, a refund of the overpayment will be made by the water utility.

#### Water Customer Supplemental Rules - - - X-4

##### Charges for Water Wasted Due to Leaks

Pursuant to provisions in Wis. Admin. Code ch. 185, the Village of Allouez Water Department (Water Department) offers a leak credit to residential customers, subject to the following conditions:

1. The customer must submit the claim of loss and/or damage to the customer's homeowner's insurance and, if denied, provide written evidence of denial.

2. The customer must provide a written request for an adjustment explaining the details of the loss and justification for the water bill adjustment based on the criteria in this policy.
3. Only residential customers are eligible for an adjustment to a water bill. This policy does not apply to nonresidential customers.
4. The water loss must be accidental, resulting from an appliance leak, a plumbing failure, or a malicious act by someone other than the customer or the property owner.
5. No water bill adjustment shall be made for water supplied after the customer has been notified. Notification may include receipt of a water bill showing excessive water usage, notice by the Water Department of a high consumption, or other notice.

If this policy applies, the adjustment to the water bill for water wasted shall be based on the water volume which exceeds the average water usage for the previous 3-month period or the average for the same 3-month period for the previous year, whichever is higher. The credit will be the excess water volume at the tariffed rate minus the cost of the Central Brown County Water Authority (CBCWA) purchased water minus \$25.00.

The Water Department may provide an extended payment period, if desired by the customer.
