Date: July 14, 2016

To: Village Board

From: Brad Lange

Re: Stadium Tax Refund

The Village Board and staff have been gathering, as best as possible, interest from our Allouez residents and committees on what the Village should do with the excess stadium tax refund. There have been multiple times in which the public could present their ideas to the Village Board at public meetings, committees have discussed ideas and most recently, a survey was provided online for the residents to complete. Our residents were informed of the survey via direct mailing and social media in order to engage our residents in the decision of how to best use the funds. I have attached the "running list" of ideas from board and committee meetings and the results of the survey that closed on June 30, 2016.

I would recommend that discussion/decision on how to use the funds be placed on a future agenda.

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy auditing of the accounts. The second part of the document provides a detailed breakdown of the monthly expenses, categorized by department and project. This helps in identifying areas where costs are high and where savings can be made. The final part of the document summarizes the overall financial performance for the period and provides recommendations for future budgeting and cost control.

The total amount for the month is \$1,234,567.89.

## .5% Sales Tax Refund

### Running List of Ideas

- Creation of a façade program for all businesses using the same criteria as the TIF program
- Entrance signs on both east bound and west bound on ramps near Webster and 172. DOT approval would be necessary.
- Invest in the corner of St. Joseph and Webster Ave. per the corridor study
- Home improvement loans/grants
- Marketing material for the property we wish to see developed - website
- Incentives for development
- Small business loans/grants for startup businesses
- Additional mockups of proposed developments within the corridor study
- Community sensitive solutions for Webster Ave. and Riverside Dr.
- Complete the corridor study south of 172
- Creating green spaces around businesses
- Landowner's out-reach program
- Business micro loan program for small businesses
- Add Village of Allouez to the water tower
- Purchase commercial property for re-development
- Park signage
- NEWEYE
- Tax refund to all residents  $\$719,000/13,967 = \$51.47$   $\$719,000/13975 = \$51.45$
- Debt reduction
- Way finding signage throughout the village
- The committee inquired about the village intentions for the pump house. Staff thought the village would entertain selling the building if the right project was presented. The committee suggested adding needed marketing or rehabilitation projects to sell the building to the list of economic development tools funded through the surplus Brown County 0.5% sales tax revenue.
- Tax relief
- Debate reduction
- Park and Recreation projects
- Bike and pedestrian improvements
- Update the zoning codes. Hire a consultant to do this

- \$500,000 for debate relief and the remainder to be used for the old village hall site – TIF
- \$200,000 for road work
- Do nothing right now
- Apply towards debate of Central Brown County water
- Sidewalks throughout neighborhoods
- Save the money for another day or put some away
- Need to promote our community
- Improve infrastructure
- Return the money to everyone
- Use the funds for programs for youth
- Spray invasive plants along East River

Would like to have the Lebrun yardwaste site paved. More residents would utilize the site if it wasn't such a mud hole. This site saves the village a lot of money on collection costs. The residents deserve better.

Perhaps street repair which because of no priority planning are falling apart. Yes I do name trustees for this. As an example Ducharme near Whitney is terrible both for visitors to see and residents to drive on. NO I do not live any where near this street but it stands as an example of carelessness in maintenance I am no used to seeing as a 50 year residence of Allouez.

Several of us residents were discussing this and came up with a great idea for our community. Allowed should take a portion of that money and build a large ice skating rink in Green Isle Park, using the community center there as a warm up house. This would be a great activity for both kids and adults for a large portion of the year here.

I would like to see beautification around the village. The current 'Welcome to Allouez' signs are dated and do not represent a 'Historically Progressive' feel. It is apparent that many Allouez residents take much pride in their homes and yards. Signage, hardscapes, and landscapes should reflect that pride in public spaces, too.

Please use some of it to redo Bryan Street, which is in incredibly poor shape. It's full of potholes, so uneven you can't use a stroller on it and it looks awful with one side paved after new water lines last year and the other side in disrepair. It's way beyond needing attention -- an embarrassment for those of us who live on it and take pride in our properties. We shouldn't have to wait another 4-5 years, as we've been told.

I would like to see the area of the old Town and Country Golf Course west of Riverside developed for an office park. As I see it, if we are to continue the same level of services we've become used to, we will either have to raise taxes or develop additional business. The bulk of the money should be for economic development projects. These projects often times seem to be labeled as "extra" projects. Well, here is "extra" money! We need to start making this community great like it once was! I saw in a committee's minutes ideas for updating the zoning code or redoing an intersection to be more pedestrian friendly - both great ideas! I also would like to throw in the idea of creating an endowment fund for art and community projects (e.g. painting the water tower, painting mural crosswalks around schools, community festival fund). An endowment fund would be a sustainable way to invest the money for years to come. I realize the majority of the people will want the money back now, but the elected officials are elected to do what is best for the community, which might not always directly line up with the most popular choice. Thank you for the opportunity to provide input!

Repair to village streets. Some are in major disrepair. Some were patched (like the one I live on) after water lines were repaired but the rest of the street is so deteriorated, we can't enjoy riding bikes or walking on the pavement anymore. We love this area and don't mind paying to live here. Some of this money could be used to invest in the area for years to come.

In order for my neighborhood to be more child friendly, I suggest repaving some of the side streets. My child cannot ride on the road due to the deteriorated condition its in. They fill the holes but don't fix the street. From my understanding, Allouez doesn't have any money budgetted for the roads. I do believe that alone would raise value to the area & look more aestheticy pleasing.

Please use the excess staduim tax fund to pay down the water debt thus decreasing our montlhy water bill is over 100\$ . 100\$ a month is simply too much for our family. We accept invites to social invites based on if we can afford to pay for the extra showers and baths. This is not a fun way to live. It has also come down to food or water when budgeting.

Many years ago, at a meeting at Greene Isle Park, residents were asked for suggestions similar to this for the Village of Allouez. I responded that I would like to see monies put toward cleaning up the East River. The lady next to me said she wouldn't let her dog swim in the East River. Point made!!! I would like to see the Village of Allouez pool a portion of this money working with Bellevue and DePere to do just that. I have seen kayakers recently on the East River. Along with the river walkway, I think many more people would utilize this waterway for recreation. It would also enhance the beauty of this area.

Doesn't the village have old water mains----some of which are leaking our water supplies? Why not speed up the plan to fix those. Speeding up the paying of debts should offer tax relief, I would think.

Return the monies directly to the taxpayers. The most seriously damaged infrastructure is the Public Trust in the elected officials to honor their role as stewards rather than continually taking and never returning. Any of the four options could be very deserving but the dollars spent there will do nothing to impact the Public Trust. Sending the money back to the taxpayers has an intangible value far greater than the dollars and not attainable through ant of the other avenues, it demonstrates integrity, fidelity and respect to the Taxpayer.

Summer beer and music at green isle similar to what Milwaukee county has done. It is very popular in Milwaukee and would set Allouez apart as all the other communities locally have a little niche ( i.e. Art walk in De pere; east-west music series in depere.

Return it to the tax-payers. It's not your money to keep or decide how to spend it. A refund check to all would be appropriate. I did "not" vote for the extra .05% to give it to the counties, only to the stadium. It's not your money, give it back.

traffic speed monitiring and enforcement of limit laws inc OWI as the board has decided unwisely to issue liquor licenses in out neighborhoods near parks and heavy pedestrian areas between other "tavern" locations at the village limits. Special concentration on Libal and East River drive where empty bottles and cans are frequently deposited. Also money to clear debris in Green Isle Park after irresponsible "renters" of that facility. Build a putt putt course (near existing parking access) for families which would get far more use and traffic than a disk golf course and far less impact on the natural habitat of the area.
