TRANSPORTATION PLAT FOR SAFE ROUTES TO SCHOOL PROJECT— CONSTRUCTION EASEMENTS

Temporary construction easements are required for grading and driveway modifications for the Webster School Safe Routes to School Project. It is requested that the village board approve the attached transportation plat so the plat can be recorded and submitted to WisDOT.

For a WisDOT project all temporary land easements (TLE's) must be defined by survey including a legal description, shown on the drawings, and approved by the governing body. These are temporary easements for grading and landscaping on private property, and some private driveway slab replacements to match the sidewalk. There is no permanent property acquisition in this project.

There are about 30 TLE's (temporary easements) required. These are shown as the shaded areas on the attached plans. Each property owner will be compensated a small dollar amount for the easements. A \$200 amount has been established as the minimum compensation. This is in line with DOT policy on projects.

Timing is important because all easements will be completed as soon as possible.

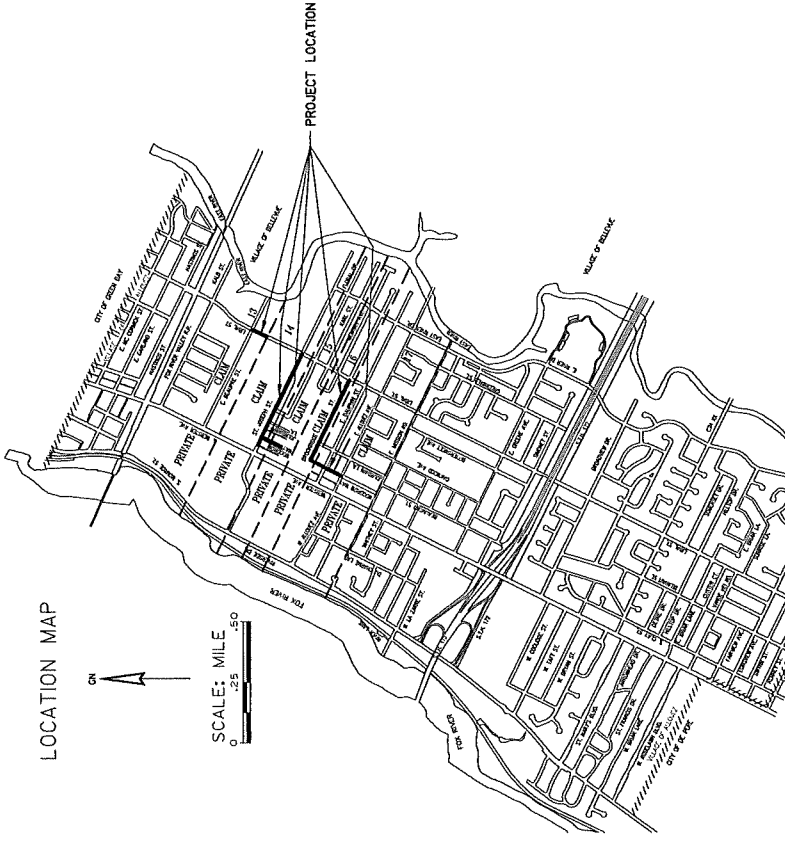

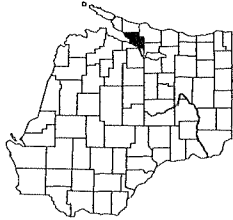

It is requested that the village board approve the transportation plat by board action.
