## Welcome

The Myasthenia Gravis Foundation of America (MGFA) is the only national volunteer health agency in the United States dedicated solely to the fight against myasthenia gravis. MGFA serves patients, their families and caregivers.

## What is myasthenia gravis (MG)?

Myasthenia gravis (pronounced My-as-theen-ee-a Grav-us) comes from the Greek and Latin words meaning "grave muscular weakness." The most common form of MG is a chronic autoimmune neuromuscular disorder that is characterized by fluctuating weakness of the voluntary muscle groups. To learn more click [here](#).

## New study to establish evidence for myasthenia gravis treatments

For the first time, patients and clinicians may have empirical evidence for the best treatments for myasthenia gravis, thanks to a newly funded research project led by MGFA Medical/Scientific Advisory Board member Donald Sanders, MD, Duke University School of Medicine, and Pushpa Narayanaswami, MD (Beth Israel Deaconess Medical Center/Harvard Medical School), and funded by a \$2.5 million grant from the Patient-Centered Outcomes Research Institute (PCORI). This grant application has been in the works for nearly a year—with MGFA providing use of the MG Patient Registry and funding a focus group to provide evidence of need. MGFA Board member, Jurgen Venitz, MD, PhD and support group leader Kathie Bibeau are advisors on the project. We at MGFA look forward to continuing to work closely with Drs. Sanders and Narayanaswami and their team as this landmark project is launched. [Click here](#) to see the press release. [Click here](#) to read more about the study.

## European Commission Grants New Indication for Soliris® (Eculizumab) for the Treatment of Patients with Refractory Generalized Myasthenia Gravis (gMG)

The European Commission has approved the use of Soliris (eculizumab) for treatment of refractory generalized myasthenia gravis (gMG) in adults who are anti-acetylcholine receptor (AChR) antibody-positive. The new classification will be launched in Germany and will be evaluated for launches in additional EU countries. To learn more about this news, [please click here](#).

## President Signs FDA Administration Reauthorization Act of 2017

MGFA is pleased to share that the Food and Drug Administration Reauthorization Act of 2017 has been signed by President Trump. To learn more please visit the National Organization for Rare Disorders website at <https://rarediseases.org/nord-issues-statement-response-signing-president-trump-food-drug-administration-reauthorization-act-2017/>.

## MGFA Announces Next Annual Conference Date & Location

## Living With MG

There is no known cure for MG, but there are effective treatments that allow many—but not all—people with MG to lead full lives. Although the treatments will not cure MG, patients may have significant improvement in their muscle strength.
