*****Turf Restoration Note*****

Weeds will be visible as the new turf begins to grow. This is a common occurrence with turf restoration and to control the weeds, the resident will need to mow on a regular basis. When properly maintained the grass will eventually choke out the weeds.

When the new blades of grass reach a height of 3-4" it is time to mow. Raise the blade on the mower a little higher than normal and begin to maintain the lawn as it was maintained in the past.
